

Crystal Glaze®

ADVANCED PAINT PROTECTION

Why Crystal Glaze?

Crystal Glaze is the most technologically advanced paint protection available in the automotive field. Originally developed for use on aircraft, the fluoro polymer formulation is designed to protect painted surfaces from damage caused by sunlight and airborne pollutants.

This product will protect your vehicles painted surfaces from the damaging effects of bird droppings and tree sap leaving a continual 'new' style gloss to your paintwork for many years to come.

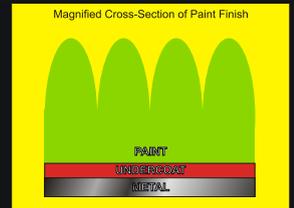

Applied by trained technicians, Crystal Glaze can be applied to any modern vehicle. The formulation creates a new layer of ultra tough clear coat on the vehicle resisting the environments fiercest pollutants.

Backed by an Australia Wide Lifetime Warranty* you will be able to enjoy your car for many years to come while maintaining it's resale value along the way.

Unprotected Paint Magnification

Without a gloss treatment the painted finished of the vehicle will be damaged by the environment.

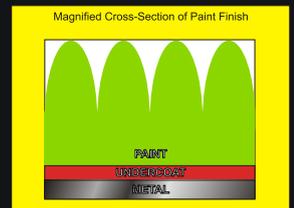

This causes a reduction in reflectivity and subsequently shine.

Protected Paint Magnification

Once treated, the paint will have an additional layer of high strength clear coat to provide protection against the environment.

The sophisticated layer of fluoro polymers will protect the paint from damage including damage caused by bird droppings.

AUSTRALIA WIDE WARRANTY COVERAGE

*Lifetime Warranty on New Vehicles

*Six (6) Year Warranty on Used Vehicles (under five years old)

Terms and Conditions apply. Consult your V.I.P. Specialist for further information.
