

## Concept

Innovative decorative concrete

Far North Queensland Range

**With imagination you can achieve anything.**

Holcim Concept™ Exposed Concrete is created by mixing unique aggregates with grey concrete and exposing to finish. The selection of products reflects our customers and professional designer architects favourite aggregate combinations.

View the decorative concrete range at our display; 19-39 Palmer Street Portsmith.

The raw materials used in the production of the Concept™ range come from nature. Some variation in consistency, appearance, quality and texture is characteristic of natural products. Samples shown in this brochure are indicative only – no guarantee of the coloured or textured finish is given or implied. Availability may vary from plant to plant.

Innovative decorative concrete

Far North Queensland Range

### As functional as it is loveable.

From home applications to major architectural projects decorative concrete is fast becoming today's popular and economical choice for flooring. When you choose from our Concept™ range you can be confident that you will receive an outstanding style solution to suit your project.

Exposed provides a skid resistant, durable finish ideal for outdoor applications such as driveways, paths, pool surrounds and alfresco spaces. This all-weather, highly trafficable finish will provide natural underfoot beauty for many years to come.

#### Spoilt for choice?

Your Holcim Sales Consultant can provide professional advice on product and colour selection.
